MAIN FEATURES

The figures below refer to industrial disputes involving stoppages of 10 man-days or more.

Approximately 318,800 working days were lost by 124,400 workers involved in 319 disputes during February 1981.

The main disputes involved education employees in New South Wales, airline employees in some States and public administration employees in all States and Territories.

4. Stoppages of work occurring at different times and at different establishments, but having a common cause may be regarded as one industrial dispute. However, an industrial dispute occurring in more than one State is counted as a separate dispute in each State. The monthly statistics refer to all disputes operative in the month, including those disputes that commenced in previous months. In Table 1 details of the number of disputes and workers involved are shown separately for disputes beginning in the month and for all disputes. Average days lost per worker involved on a monthly basis are not comparable with the yearly averages, because workers involved are included in each month in which they are involved in disputes, while they are counted once only for each dispute in the annual statistics.

EXPLANATORY NOTES

Introduction

More detailed information about disputes appears in the quarterly publication *Industrial Disputes, Australia* (6322.0).

2. The statistics of industrial disputes are compiled according to the Australian Standard Industrial Classification (ASIC), described in *Australian Standard Industrial Classification, 1978*, Vol. 1 (1201.0).

Coverage

3. The statistics refer only to disputes involving stoppages of work of ten man-days or more. Workers involved include workers directly and indirectly involved in disputes. Workers indirectly involved are those thrown out of work at the establishments where the stoppages occurred, but who are not themselves parties to the dispute. Particulars of some stoppages (e.g. those involving a large number of establishments) may have been estimated and the statistics therefore should be regarded as giving a broad measure of the extent of stoppages of work (as defined).
